

ABSTRACT

5 A composition for promoting extension of bladder
smooth muscle, comprising adrenomedullin. The composition
of the present invention may be used to ameliorate a
urination disorder. The urination disorder may be a urinary
incontinence selected from the group consisting of urge
incontinence, reflex incontinence, and overflow
incontinence. According to the present invention, a method
10 is provided for ameliorating a urination disorder using a
composition comprising adrenomedullin. Further, use of
adrenomedullin in production of a drug for ameliorating a
urination disorder is provided.
